

MARIA ALEXANDRA RADU

I am a problem solver with 6 years of experience in CX and software engineering always looking for challenging projects at the heart of the voice tech industry and big data space, as well as virtual assistants.

I see technology as a driver of innovation and the beginning of a continuous learning curve. Keen to promote global active citizenship and passionate about entrepreneurship in developing states. I love to cook and make people happy, also in love with Devon, data and dogs.

WORK EXPERIENCE

Software Engineer 08/2016 – present
JP Morgan Chase & Co, Bournemouth, UK

I work as a software engineer covering projects for developing Virtual assistants, Conversational experiences, Data Analytics and Visualisations.

Technology Business Analyst 05/2016 – 08/2016
King Entertainment Ltd, Barcelona, Spain

Worked in the customer operations team to create and support the technicians with the best tools, self-service capabilities and enabling them to automate manual tasks and speed up the support process for the VIP customers.

EDUCATION

MSc Computer Science 10/2018 – present
Bath University, Bath, UK

Focusing on Human Computer Interaction and Machine Learning.

BA Joint Hons Business Management and Publishing Media 09/2012 – 07/2016
